Made a Mano

is a Danish art, crafts and tiling company that over the last decade and a half has been an international trendsetter in developing new and bold designs, patterns, shapes and colours for both interior and exterior use.

Since 2001 we have build The MADE A MANO collection and many of our products are today considered modern classics.

We have challenged the concept of how to work with glazing and patterns, and continue to strive to further develop the concept of working with colours, patterns and structure.

All MADE A MANO orders are bespoke and our products are always exclusively custom made. Each product is unique and never just accuratecopies. There are little variations in each tile, which is what makes our product truly special.

We are proud to offer tailor made solutions for private costumers as well as commercial projects.

Our head office and flagship showroom is located in Copenhagen, Denmark. Our production is based in factories in Italy. MADE A MANO ships globally.

LAVA STONE

The Jewel in our crown is solid lava stone extracted from the quarries of Mount Etna. Raw and beautiful with little sparkles from the noble stones inside the lava, these stones are hand painted using the unique MADE A MANO glazings and patterns. We carry 32 standard sizes, but almost everything is possible.

Solid lava stone of the finest quality used by us is suitable for use both indoors and outdoors. MADE A MANO lava stone easily tolerates both fire and ice and can be used in an oven as well as outdoors in Arctic conditions. The functionality and durability make our products more than just decorative. MADE A MANO products are truly multipurpose ranging from tiles for floors and walls, to table tops, fireplaces, terraces and swimming pools.

Being the most durable natural stone in the world, lava stone is perfect for use in high traffic areas and our products are today found in some of the busiest luxury restaurants and hotels around the world.

Dimensions: from 5x5 cm to slabs measuring 360 x 150 cm.

TERRA COTTO

Our terra cotto tiles are hand painted tiles using an excellent quality of industrial terra cotto base. They are suitable for use as wall tiles and approved as floor tiles for non high traffic areas.

Dimensions: 10x10, 15x15, 20x20 and 30x30 cm
