INNOVAZIONE E TRADIZIONE TOSCANA

Una grande esperienza cresciuta in mezzo secolo di ricerca sui materiali, sulle tecniche di lavorazione, per le più efficaci realizzazioni e soluzioni estetiche. ISA BAGNO è un'esperienza maturata nella storia dei luoghi, la Toscana, bellissima terra ricca di castelli medievali e ville rinascimentali, un paesaggio ordinato di campi coltivati e boschi, nel quale la crescita e lo sviluppo industriale hanno conferito all'intero territorio un ruolo da protagonista e un volto nuovo, sia sociale, che economico, che culturale. In questo quadro si è sviluppato il percorso dell'azienda, centrato sull'evoluzione delle tendenze e la progettualità interna, rafforzate da una attenta strategia commerciale e distributiva.

INNOVATION & TUSCANY TRADITION

A company grown in half a century of research on the materials, on the techniques of workmanship, for the most effective realizations and aesthetical solutions. ISA BAGNO is also an experience matured in the history of the places, Tuscany, beautiful rich earth of medieval castles and Renaissance villas, an orderly landscape, in which the growth and the industrial development have conferred to the whole territory a protagonist role and a new face, is social, that economic, that cultural. In this picture the run of the firm is developed, centered on the evolution of the tendencies, strengthened by a careful commercial and distributive strategy.

Une grande expérience de 50 ans dans la recherche des matériaux, des systèmes de fabrication, pour créer des solutions toujours à l'avant-garde dans l'esthétique et le confort. Une expérience qui vient aussi de son territoire, la Toscane, terre de villages du moyen-âge et vertes collines où la tradition se mélange au développement industriel. Dans ce contexte, l'évolution a toujours été basée sur les tendances et la création, grâce aussi à une stratégie de développement portée sur différents marchés et une grande attention à la qualité de son réseau de distribution.

ISA BAGNO bedeutet "Kraft der Erfahrung", dank der Nachforschung auf Materialien, Bearbeitungen und aestetischen und technischen Realisierungen in 50 Jahren erfuehlt. ISA BAGNO ist aber auch eine Erfahrung in der Geschichte der Toskana, wo die wunderbare mittelalterliche Schlosse und die elegante Renaissance-Landhauser in einem geordnetem Landschaft von Feldern und Wäldern mit der industriellen Entwicklung zusammen leben. Mit diesem Vorbild und dank der inneren Planung hat die Firma seine Ueberfahrt entwickelt, und seine Verteilung und Handels-Strategie verstaerkt.

GLASS AND MIRRORS EXPERIENCE

Flessibilità, contaminazione e creatività sono le parole chiave di “REFLECTIONS”. Il nuovo progetto di Isa Bagno che offre la possibilità di utilizzare dei singoli “elementi” per creare atmosfere individuali nell’ambiente bagno. Un mix di oggetti liberi di essere utilizzati permettendo così di sviluppare proposte personalizzate anche combinando materiali e colori eterogenei tra loro.

Flexibility, artistic contamination and creativity are representing the concept of “REFLECTIONS”. It’s a new IsaBagno project, using single elements to create individual and unique atmosphere in the bathroom. Different objects you are free to use to develop personal projects combining unique shapes, materials and colors.

Flexibilité et créativité caractérisent le nouveau projet de IsaBagno „REFLECTIONS“, un projet qui à travers l’emploi d’elements simples arrive à créer d’atmosphères uniques dans la salle de bain. Un mélange d’objets libres avec couleurs, formes et matériaux différents pour développer toutes les propres idées.

Nachgiebigkeit und Kreativität sind Schlüsselpunkte von „REFLECTIONS“, das neue Projekt von Isa Bagno, um besondere und persönliche Atmosphäre im Badezimmer zu kreieren, mit der Nutzung von einzelnen Elementen. Gegenstände, die man anstandslos benutzen und mit verschiedenen Formen, Farben, Materialien vermischen kann.

ASOLA

ECOLEGNO HPL / HPL LAMINATED

ecolegno crema + vasca fumè

I piani ASOLA sono realizzati in laminato HPL (high pressure laminated), uno stratificato in resina fenolica con finitura legno oppure nell'innovativa finitura "FENIX". La finitura legno assicura la massima naturalezza visiva ed al tatto con i pregi di un effetto tutto natura garantendo al tempo stesso grande resistenza all'usura ed un a facile pulizia. L'effetto legno è disponibile in tre varianti di colore su base rovere.

ASOLA countertops are made in HPL (High pressure laminated), a composite phenolic resin multilayer in wood finish or in a new "Fenix" finish. The wood finish assures the maximum visual naturalness and soft touch with a real nature effect guaranteeing at the same time great resistance to the scratches and easy to cleaning. The wood finish is available in three variations of color on an oak base.

FENIX HPL NANO TECHNOLOGY & DESIGN

Specialmente sviluppata per l'utilizzo nell'ambiente bagno, la finitura FENIX nasce dall'incontro tra tecnologia e design. Resine termoplastiche di ultima generazione vengono sottoposte ad un processo NANOTECONOLOGICO per creare una superficie estremamente compatta. Il risultato è un'altissima resistenza ai graffi ad alle abrasioni, una superficie estremamente opaca, a bassa riflessione, molto morbida al tatto. Resistente alle macchie ed alle impronte, la superficie in FENIX è totalmente idrorepellente.

Specially created for bathroom applications, FENIX material is a concentrated of technology and design. Thanks to the use of last generation of thermoplastic resins and a NANOTECHNOLOGY process the result surface is extremely closed. The material offers a very high resistance to scratches and abrasion, extremely matt surface, low light reflectivity and soft touch. The surface is easy to clean, resistant to acid solvents and anti-fingerprints, 100% hydro-repellent.

Spécialement développé pour la salle de bain, le materiel FENIX est une véritable mix de technologie et design. Grâce à l'utilisation de résines thermoplastiques de dernière génération et un procédé à NANOTECHNOLOGIE, la surface est extrêmement fermée. Ce materiel offre la plus grande résistance aux impacts et abrasion, une surface extrêmement mate, avec faible réflectivité et une touche soyeuse. Complètement résistant aux taches et au traces de doigts, la surface est 100% imperméable.

Besonders geschaffen für Badezimmer-Anwendungen, FENIX Material ist konzentriert Technologie und Design. Dank des Gebrauches der letzten Generation von thermoplastischen Harzen und einem NANOTECHNOLOGY gehen in einer Prozession die Resultat-Oberfläche wird äußerst geschlossen. Das Material bietet einen Resistent gegen Kratzer und Abreiben, extrem matt Oberfläche, Geringe Lichtreflexion und weicher Touch. 100% Wasserabweisend.

F I L O

Design by A+R Studio

Il lavabo ad appoggio sembra fluttuare in aria grazie ad un filo sottile di legno che nasconde una accurata lavorazione artigianale del bordo smussato a 45°. La sapiente lavorazione del legno è accentuata dalla particolare finitura Essenza "Wild".

The lay-on basin appear to be floating over the blade of wood created by an handicraft workmanship of the 45° cut edge. The natural wood sprit of the product is also done by the new "Wildwood" finish.

La vasque posée semble suspendue dans l'aire liée uniquement à un léger trait de bois qui cache le plan avec bord épais découpé à 45°. Le travail artisanal de ce plan est accentué par la nouvelle finition "Wild" du bois.

Das Becken zu Unterstützung scheint in Luft dank eines dünnen Fadens des Holzes zu schwanken, das eine genaue Handwerks-Kunstfertigkeit der zu 45° abgeschrägten Ecke verbirgt. Holzspriet des Produktes wird auch durch die neue "Wildwood"-Schicht getan.

F I L O

in ESSENZA WILD //
SCARVED WILDWOOD

L'effetto vissuto del legno "WILD" è ottenuto tramite un processo di levigatura manuale che esalta la venatura del legno e porta nel bagno un pezzo di vera natura, per un ambiente caldo e accogliente, perfetto per rilassarsi. La finitura essenza WILD è disponibile in tre colorazioni su base rovere (cannella, carbone e paglia).

The visual effect of the WILD wood comes from a special handcraft treatment that highlight the wood grain, bringing a piece of authentic nature into the bathroom. The result is a warm, welcoming space, perfect for relaxation. The WILD wood finish is available in three colors on an oak base (cannella, chocolate e paglia).

L'effet bois ancien de la nouvelle finition WILD est réalisé avec un système manuel de ponçage qui met en relief le veinage du bois et porte dans la salle de bain un véritable morceau de nature. Le résultat est une ambiance chaude et accueillante, parfaite pour le relax. Le bois WILD est disponible en trois couleurs (cannella, chocolate e paglia).

Der lebendige Effekt des Holzes Wildwood entsteht aus der besonderen Behandlung, und bringt auf diese Weise ein echtes Stück Natur ins Badezimmer. Das Ergebnis ist ein warmes und einladendes Ambiente, perfekt zum Entspannen und Regenerieren. Die WILD Holzschicht ist in drei Farben vorhanden.

An elegant technology to integrate the TV LED in the bathroom mirror, available in three screen sizes.

Grande élégance pour le miroir avec TV LED intégrée dans le miroir, et écran disponible en trois tailles.

Eine elegante Technologie, um das Fernsehen TV LED in den Badezimmer-Spiegel, vorhanden in drei Schirm-Größen zu integrieren.

SMART TV BOX

La TV integrata nello specchio diventa una console multimediale dove si fondono i contenuti audio video e la connessione internet.

The TV mirror become a real entertainment device which includes audio, video features as well as internet connection.

Le système TV intégré dans le miroir devient un véritable système multimedia qui se relie à l'internet.

Der TVspiegel wurde ein echter Unterhaltungseinfall, der Audio-, Videoeigenschaften ebenso wie Internetverbindung einschließt.

Sicurezza e conformità

Safety norms

Normes de securité

Sicherheitsvorschriften

Gli apparecchi elettrici con tensione nominale da 50 a 1000V in corrente continua e da 75 a 1500V in corrente alternata, sono soggetti alla direttiva CEE BASSA TENSIONE che regola la sicurezza degli apparati elettrici nei paesi Europei. Gli apparecchi con tensione di alimentazione inferiore a 50V non sono compresi in questa direttiva in quanto a bassissima tensione e non pericolosi per il corpo umano. Il marchio CE è un'autocertificazione che assicura che i prodotti I.S.A. sono testati nel rispetto delle norme:
CEI EN 60 598.1 prescrizioni generali
CEI EN 60 598.2.1 apparecchi fissi di uso generale
CEI EN 60 598.2.6 appar. d'illuminazione con trasformatore per lampada a incandescenza

Tous les appareils électriques sous tension de 50 à 1000V en courant continu et de 75 à 1500V en courant discontinue, sont soumis à la directive CEE BASSE TENSION qui règle la sureté des équipements è lectriques dans la Communeauté Européenne. Les appareils alimentés à tension non supérieure à 50V ne sont pas concernés par la directive étant à très faible tension et pourtant non dangereux pour le corps humain. Le marquage CE est une autocertification qui assure que les produits I.S.A. sont testés conformément aux normes:
CEI EN 60 598.1 prescriptions générales
CEI EN 60 598.2.1 appareils fixes à usage général
CEI EN 60 598.2.6 app.d'éclairage avec transformateur pour lampes

Electrical appliances with nominal tension from 50to 1000Volts (direct current) and from 75 to 1500 Volts (alternating current) are subject to CEE LOW TENSION regulations . Electrical appliances in the EU must comply with these regulations. Electrical appliances where the current is lower than 50 Volts are not dangerous to the human body and are not subject to this regulation. CEE certifications guarantee that ISA products are tested according to the following regulations:

Elektrische Anlagen mit Nennspannung von 50 bis 1000V bei Dauerstrom und von 75 bis 1500V bei Wechselstrom unterliegen der EG-Niederspannung-Vorschriften. Diese Vorschriften regeln die Sicherheit der elektrischen Anlagen in den europäischen Ländern. Da die elektrischen Anlagen mit Speisungsspannung unter 50V ungefährlich für den menschlichen Körper sind, sind sie von diesen Vorschriften nicht berücksichtigt. Die CE-Bestätigung garantiert, daß alle ISA Produkte laut folgender Normen geprüft worden sind:

CEI EN 60 598.1 general instructions
CEI EN 60 598.2.1 fixed appliances of general use
CEI EN 60 598.2.6 lighting appliances with transformer for incandescent bulbs

Progettazione dell'illuminazione nel bagno

Zone diagram

Projet d'éclairage del la salle da bain

Skizze der Räume 0 bis 3

L'aspetto della sicurezza elettrica assume un rilievo particolare nel bagno. Per questo infatti le norme di installazione (CEI 64-8) impongono prescrizioni precise riguardo agli apparecchi di illuminazione, che devono necessariamente essere installati da un professionista, installatore o elettricista. In base alla posizione della vasca e del piatto doccia, sono state definite 4 zone di installazione.
Zona 0: il volume interno della vasca o del piatto doccia.
Zona 1: il volume situato sopra tale zona per un'altezza di 2,25 mt.
Zona 2: il volume posto a 0,6 mt. dalla precedente per un'altezza di 2,25 mt.
Zona 3: il volume fino a 2,40 mt. di distanza dalla zona precedente.
All'interno di ognuna di queste zone è possibile installare i seguenti apparecchi:
ZONA 0: E' vietato l'utilizzo di qualsiasi apparecchio elettrico.
ZONA 1: Sono ammessi apparecchi fissi in BTS (25V) e grado di protezione IPX4. Sono vietati apparecchi di illuminazione e qualsiasi tipo di prese.
ZONA 2: Sono ammessi apparecchi di illuminazione fissi in classe II e grado di protezione IPX4. Eventuali prese a spina devono essere alimentate da trasformatore d'isolamento a bassa potenza.
ZONA 3: Non sono previste limitazioni purché gli apparecchi abbiano protezione non inferiore a IPX1 ed eventuali prese a spina siano protette tramite Interruttore differenziale ad alta sensibilità.

La sureté électrique a un relief particulier dans la salle de bain. Pour cela les normes d'installation (CEI 64-8) sont très précises concernant les appareils d'éclairage, qui doivent necessairement etre installés par un professionnel agréé, installateur ou électricien. Selon la position de la baignoire et dun bac à douche, ils ont été créés 4 zones d'installation.
Zone 0: le volume interne de la baignoire ou du bac à douche
Zone 1: le volume qui s'élève au dessus de cette zone pour une hauteur de 2,25 mt.
Zone 2: le volume qui s'étend pour une distance de 0,6 mt. autour de la précédente pour une hauteur de 2,25 mt.
Zone 3: le volume jusqu'à 2,40 mt. autour de la précédente.
A l'interieur de ces zone il est prevue l'installation des appareils suivants:
ZONE 0: Il est interdit l'utilisation de tous les appareils électriques
ZONE 1: Admis les appareils fixes en B.T. (25V) et degré de protection IPX4. Sont interdits tous les appareils d'éclairage et prises de courant.
ZONE 2: Admis les appareils d'éclairage fixes en classe II et degré de protection IPX4. En cas d'utilisation de prises de courant, ces dernières doivent etre alimentés par un transformateur d'isolation à faible puissance.
ZONE 3: Ne sont pas prevues des limitations sauf une degré de protection minimum IPX1. Etque les prises decourant soient protégées par un circuit différentiel à haute Sensibilité.

The safety of electrical appliances is very important in the bathroom. Fitting norms (CEI 64-8) give precise instructions regarding lighting appliances. The fitting of electrical appliances MUST BE MADE BY A QUALIFIED ELECTRICIAN ONLY . Four protection areas, relating to the position of the bath or shower, have been mentioned:
Zone 0: Within the bath or shower tray
Zone 1: Volume above zone 0 up to 2.25 m height
Zone 2: Within 0.6 m from zone 1 up to 2.25 m height
Zone 3: Within 2.40 m from zone 2
The following electrical appliances can be placed in:
ZONE 0: No electrical appliance can be placed in zone 0
ZONE 1: Around this protection area , only fixed electrical appliances in BTS (25V) can be placed. They must comply with IPX4 protection. Lighting appliances and sockets are forbidden .
ZONE 2: Around this protection area fixed lighting appliances shall comply with Classe II regulations and IPX4 protection. All Sockets shall have low tension isolation transformers .
ZONE 3: All electrical appliances complying with IPX1 protection shall be placed in Volume 3. All sockets shall be protected by the use of a high sensitivity differential switch.

Da die Sicherheit der elektrischen Anlagen im Badezimmer sehr wichtig ist, gebieten die Anschlußnormen (CE 64-8) genaue Vorschriften in Bezug auf die Beleuchtungsanlagen, deren Montage durch einen qualifizierten Elektrofachmann vorgenommen werden muß. In Bezug auf die Lage der Badewanne oder der Duschwanne sind 4 Räume bestimmt worden:
Raum 0: Innenraum der Badewanne oder Duschwanne
Raum 1: er verbreitet sich über den Raum 0 bis 2,25 m in Höhe
Raum 2: er verbreitet sich 0,6 m rundum Raum 1 bis 2,25 m in Höhe
Raum 3: er verbreitet sich bis 2,40 m rundum Raum 2
In den o.g. Räumen sind folgende elektrischen Anlagen erlaubt:
Raum 0: Hier ist keine elektrische Anlage erlaubt.
Raum 1: Nur feste Anlagen aus BTS (25V) nach IPX4 Schutzstufe sind im Raum 1 erlaubt. Alle Beleuchtungsanlagen und alle Steckdose sind hier verboten.
Raum 2: Alle festen Beleuchtungsanlagen nach Klasse II Vorschriften, die der IPX4. Schutzstufe entsprechen, sind im Raum 2 erlaubt. Alle Steckdosen müssen durch einen Isolierungstransformator mit schwacher Stromstärke gespeist werden.
Raum 3: Alle elektrischen Anlagen nach IPX1 Schutzstufe sind im Raum 3 erlaubt. Alle Steckdosen müssen durch einen FI-Schutzschalter geschützt sein.

Schutzstufe

 **INDICE IP: Resistenza offerta dall'apparecchio alla penetrazione di solidi e liquidi.**
La prima cifra (X) caratterizza l'entrata dei corpi solidi:
Resistance of the fitting to the penetration of solids and liquids.
The first number (X) identifies the protection degree against the entry of solid bodies
Resistance offerte à la pénétrations des corps solides et liquides.
Le premier chiffre (X) concerne des corps solides:
Widerstand der Anlage vor der Eindringung von Feststoffen und Flüssigkeiten. Die erste Ziffer (X) bezeichnet die Schutzstufe vor der Eindringung von Feststoffen.

IP 1... Protetto contro penetrazione di corpi solidi di dimensioni superiori a 50mm.
Protected against the entry of solid bodies with dimension of more than 50mm.
Protégé contre les corps solides de dimension supérieur a 50mm.
Geschützt vor der Eindringung von Feststoffen größer als 50mm.

IP 2... Protetto contro penetrazione di corpi solidi di dimensioni superiori a 12mm.
Protected against the entry of solid bodies with dimension of more than 12mm.
Protégé contre les corps solides de dimension supérieur a 12mm.
Geschützt vor der Eindringung von Feststoffen größer als 12mm.

IP 3... Protetto contro penetrazione di corpi solidi di dimensioni superiori a 2,5mm.
Protected against the entry of solid bodies with dimension of more than 2,5mm.
Protégé contre les corps solides de dimension supérieur a 2,5mm.
Geschützt vor der Eindringung von Feststoffen größer als 2,5mm.

IP 4... Protetto contro penetrazione di corpi solidi di dimensioni superiori a 1mm.
Protected against the entry of solid bodies with dimension of more than 1mm.
Protégé contre les corps solides de dimension supérieur a 1mm.
Geschützt vor der Eindringung von Feststoffen größer als 1mm.

La seconda cifra (Y) caratterizza l'entrata dei corpi liquidi:
The second number (Y) identifies the protection degree against the entry of liquids
Le deuxième chiffre (Y) concerne des corps liquides
Die zweit ziffer (Y) bezeichnet die Schutzstufe vor der Eindringung von Flüssigkeiten

IP...0 Non protetto
Unprotected
Non protégé
Ungeschützt

IP...1 Protetto contro le cadute verticali di gocce d'acqua
Protected against the vertical falling of water drops
Protégé contre chutes verticales d'eau
Geschützt vor senkrechtem wasserfall

IP...2 Protetto contro le caduta dell'acqua con inclinazione massima di 15°
Protected against the vertical falling of water with a maximum inclination of 15°
Protégé contre chutes d'eau inclinées de 15° maximum
Geschützt vor Wasserfall bei max 15° Neigung

IP...3 Protetto contro la pioggia
 *Protected against rain*
Protégé contre la pluie
Geschützt vor Regen

IP...4 Protetto contro gli spruzzi
 *Protected against sprinklings*
Protégé contre les jets d'eau
Geschützt vor Wasserstrahlen

Tonalità luce LED (K)
Color of the led light
Tonalité de l' éclairage led
Farbe des geführten Lichtes

La tonalità della luce LED (temperatura del colore) viene misurata in gradi kelvin . La tonalità della luce solare è di 5000 ° kelvin.
The color of the LED light (color temperature) is mesured in Kelvin degrees. Sinlight is 5000°K
La tonalité de l' éclairage LED est mesuré en degrés kelvin. L' éclairage solaire est 5000°K
Die Farbe des LED Lichtes (färbt sich Temperatur) ist mesured in Graden Kelvin

3000-3500 K Luce Bianca calda / Warm White light

3500-5000 K Luce Bianca Neutra / Warm White light

5500-7500 K Luce Bianca Fredda / Cool White light
